

Installations are now easy and done **Right the First Time**

Does this sound familiar?

You get a job and send out your installer. The measurements are handwritten and Joe's handwriting isn't always the best – *Is that a 4 or a 9?* Your team places the order just to find out during installation, nothing fits. Your customer is frustrated, you've lost time and money, they leave a negative review and it is now impacting future business.

Stop the back and forth.

Seamlessly connect the front end of your business with the back end of your business through a CRM custom built for the installation world. You can unlock the ultimate tool for better, faster and more accurate installs, meaning better reviews online and a greater chance of winning future business with:

Informative Dashboards

them so you can
win more business
without the hassle

Who we are

Blinds Portal has been serving window installations companies since 2017 delivering solutions, customized software, mobile applications and solving big problems through technology. We consider ourselves experts in automating your manual processes.

How we have made an impact

"This CRM has transformed our dealings with Home Depot from being archaic, cumbersome and time consuming to now having an efficient and simplified system to work through major issues such as with illegible handwriting by our installers on measures and forms as well as all orders being processed in a timely manner with much less hassle and frustration."

Linda
Office Manager

"Blinds Portal improved our business immensely. It helped us be more efficient with our time, process our business digitally, we said goodbye to paper processes, complete at least 20-30 more jobs a month, and best of all, our installers absolutely love it. With just a click of a button, all of their documents are signed and sent. Our communication with Home Depot has become so much easier and efficient because we are able to give them more accurate information through Blinds Portal, the time stamp capabilities and photos have really helped us the most. We couldn't be more satisfied and thrilled with this program and CRM."

Robin and Larry
Co-Owners of L.E.C. Enterprises, Inc.
